Abstract (en)

[origin: EP2000610A1] Set comprises first and second panels (1, 2) having a first edge (6) with a holding profile having a locking element protruding into the holding profile of a second edge (7). The locking element of the first and/or second panel can be pressed into the locking position during connection of a third panel (3) with the first and/or second panel. Preferred Features: The locking element is arranged in a blocking groove of the holding profile of the first edge and a further blocking groove is provided on the holding profile of the first edge.
