Abstract (en)

[origin: EP2000642A2] Production of an exhaust gas treatment device (1) comprises measuring the peripheral geometry of one insert (2) in an axial section of each insert, axially inserting the insert into a housing (4) and taking into account the measured peripheral geometry of the insert during deformation of the housing. An independent claim is also included for an exhaust gas treatment device. Preferred Features: The measured peripheral geometry of each insert is assigned to peripheral segments and an average peripheral geometry is determined for each peripheral segment.
