Abstract (en)

[origin: WO2007113629A2] A method for making a composite item comprising at least one cast cosmetic product (10) within a filling volume (6) defined by the inner walls (5a, 5b) of a mould (3a, 3b), and subsequently solidified, and at least one solid decorative element (1), the method comprising the steps of: a. holding the solid decorative element (1) at one portion of an inner wall (5a) of the mould, said solid decorative element at least partially projecting within the filling volume (6); b. pouring the cosmetic product (10) in the liquid state within the mould until said filling volume is reached; c. solidifying the cosmetic product; d. removing the solidified cosmetic product from the mould after said step of holding the solid decorative element (1) has been completed.
