Abstract (en)

[origin: WO2007114008A1] A planographic printing plate packing box that can help solve problems regarding cost reduction and management adaptability to multiple product types, and a planographic printing plate packing structure using the planographic printing plate packing box is to be provided without damaging the coat of the planographic printing plate. It is a is planographic printing plate packing box (30), formed by folding one or more corrugated fiberboards, is a packing box for fitting inside and packing a stacked object (20) of planographic printing plates. Side end portions of corrugated fiberboards are folded, and sides (44T) and (48T) at the tips of end side portions are so arranged as to oppose a side of the stacked object, and the sides of the tips of end side portions and the side of the stacked object are at least as close to parallelism as 30 degrees.
