Abstract (en)

[origin: WO2007115872A1] The application describes a solid textile care composition comprising a water-soluble carrier, a water-soluble polymer, a textile care compound and a perfume. In particular, the application discloses a solid textile care composition in which the water-soluble carrier is present in particulate form and has an envelope composed of the water-soluble polymer, the textile care compound and the perfume, and also a solid textile care composition in which the water-soluble carrier is present in particulate form and is coated with the textile care compound, and the coated water-soluble carrier has an envelope composed of the water-soluble polymer and the perfume, and a solid textile care composition in which the water-soluble carrier is present in particulate form and has an at least partial envelope composed of the water-soluble polymer and the perfume, the envelope and the unenveloped regions being coated with the textile care compound. Additionally described are textile care washing or cleaning compositions comprising the textile care composition.
