Abstract (en)

[origin: WO2007112773A1] The present invention relates to a fastening device for structural units in dry construction, in particular for C-ceiling profiles, comprising a first fastening element (1) having a sheet-metal profile which is bent in a U shape and has a base section (3) and two fastening legs (4, 4'). It is characterized by a second fastening element (2) which has at least one connecting section (9) for securing to a base, wherein the second fastening element (2) has a supporting section (11) for the base section (3) of the first fastening element (1), and wherein an elastic damping element (15) is arranged between supporting section (11) and base section (3).
