Abstract (en)

[origin: WO2007115537A1] The invention relates to a merchandise securing device (1) comprising at least one merchandise securing element (4, 5, 15) and a closing mechanism (6) with a fastening element (8) that can be inserted into a clamping element (18, 19, 20) of the closing mechanism (6) similar to a needle. Such a merchandise securing device (1) is provided with a housing contour that is essentially flat in the attachment area (14) in which the merchandise securing device (1) is fixed to the merchandise. The merchandise securing device (1) comprises a recessed closing mechanism (6) while the at least one merchandise securing element (4, 5, 15) located in or on the merchandise securing device (1) uses acoustomagnetic (AM) technology and/or radio frequency (RF) technology and/or radio frequency identification (RFID) technology.
