Abstract (en)  
[origin: WO2007114690A2] Method to manufacture a device for balancing a vehicle wheel; this device comprises a fastener for attaching and fixing the device to the vehicle wheel, a plastic body and a weight, characterised in that the method also comprises placing at least part of the fastener in a mould, placing the weight in the mould and introducing a plastic material into the mould. Also a device for balancing a vehicle wheel; this device comprises a fastener for attaching and fixing the device to the vehicle wheel, a plastic body and a weight, characterised in that the fastener is attached to the weight solely by means of the plastic body. Also a mould to manufacture a device for balancing vehicle wheels; this device comprises a fastener for attaching and fixing the device to the vehicle wheel, a plastic body and a weight, characterised in that the mould is equipped with first aids for positioning the fastener relative to the mould. Also a mould to manufacture a device for balancing vehicle wheels; this device comprises a fastener for attaching and fixing the device to the vehicle wheel, a plastic body and a weight, characterised in that the mould is equipped with second aids for positioning the fastener relative to the mould.
