Abstract (en)
[origin: US2007192718A1] A method of modifying individual graphic user interface controls according to predefined settings including the steps of identifying at least one graphic user interface control object with a plurality of states and/or event handlers, assigning a user-selectable visual modification to the control object, associating the visual modification with a state of the control object, saving the assignment to a configuration file and applying the visual modification to the control object upon display of the control object in the associated state or upon firing of the associated event handler.
