Abstract (en)
[origin: DE102006014148A1] The device has a measuring unit (33) that is connected with an energy source and is provided with energy that is required for measurement when a movable unit contacts with a contact unit (25). A radio module (26) is connected with the measuring unit and the energy source and is provided with energy when the movable unit contacts with the contact unit for transmitting a radio signal with measured information. A radio receiver transmits the radio signal of the radio module.
