Abstract (en)
[origin: WO2007110108A1] A phone, particularly an ear phone, is provided which has two transducer housings (41, 42) and a flexible headband (43). The headband (43) is preshaped such that in its relaxed, unworn state it is coiled and has at least one turn. In this way, the phone can be stowed in space-saving fashion when it is not being worn.
