Abstract (en)
[origin: EP2002985A1] The mobile data-processing hand-held device has a loading flap (9) with a pivot (10) at one end by which it is fastened on the housing (2). The center section of the loading flap is formed so that the two adjacent sub-sections, that is to say the sub-section pivotably mounted on the housing, and the other sub-section which forms the free end, of the otherwise rigidly formed loading flap, are pivotably arranged in relation to each other, wherein a print roller (7) is arranged on the sub-section of the loading flap which forms the free end.
