Abstract (en)  
A packaging system (50) includes a container (60) having a closed end, an open end, a longitudinal axis running through the closed end and the open end, and an outer surface, a closure assembly (70) fitted to the open end of the container and having an access port, and a detachable cap (80) disposed over the access port. The system also includes a label (90) disposed about the container, the label having a first region angled relative to the longitudinal axis, the first region consisting essentially of a name of a product. A method of alerting a practitioner to contents of a container (60) is also provided.
