Abstract (en)

[origin: EP2003073A1] The gaff (1) has a pole (2) with a bent part (3) at one of its ends. A tubular extension bar (9) cooperates either with the part (3) or with a free end of the pole found opposite to the part (3), according to the usage of the gaff. A hook (8) is integrated to the pole at the level of the part (3), where the hook has gripping parts (8a, 8b, 8c) gripping elastic connections of a covering element of a skip or a container or other space or surface to be covered.
