Abstract (en)
[origin: US2007235466A1] A spill proof, portable dispenser including a top attached to a bottom on a first side, a lid attached to the bottom on a second side, and wherein the top can only be opened after first opening the lid. Thus, when the dispenser is closed, the top is prevented from opening relative to the bottom unless the lid is first opened. The dispenser can be easily refilled by first opening the lid and then opening the top to access the dispenser's interior.
