Abstract (en)
[origin: DE102006015249A1] The device has coating module (2) as assembly unit with a device for guiding a sheet of transfer foil (5) to transfer gap (6) in and out of transfer gap. The coating module is assigned to the coating head (1), so that the coating module is placed at any position in the machine. The machine is a printing machine according to the printing method of the waterless-offset or the gravure or a printing machine according to satellite execution.
