Abstract (en)

[origin: EA014374B1] There proposed a rig for selectively inserting coiled tubing or threaded tubulars into a well includes a mast extending upward from a mast carrier and a coiled tubing injector and a coiled tubing reel supported on a coiled tubing carrier separate from the mast carrier. The mast may be pivotal on the mast carrier to attach the coiled tubing injector to the mast while the injector is supported on the coiled tubing carrier to the mast, such that the coiled tubing injector is raised to the operative position when the mast is raised.
