Abstract (en)  
[origin: EP2005860A1] A furnishing element (10) comprises two frames (12, 14) positioned opposite each other and at least a connection element (16, 18) opposite the two frames (12 and 14), the two frames (12, 14) and the connection element (16, 18) being coupled so as to define a surface (20) in cooperation with which a supporting plane (22) is positioned. The furnishing element (10) also comprises a traction element (21) able to be driven rotationally and able to act on the two frames (12, 14) and to be selectively driven so as to determine a desired traction of the two frames (12, 14), at least one connection element (16, 18) being pre-positioned with respect to the two frames (12, 14).
