Abstract (en)
[origin: EP2006081A1] The device has an external radial stop constituting a guide (1) that extends longitudinally with respect to a forming neck (3). Sealing strips (10) are equipped with a set of slides (12). The length of the guide is equal to the distance separating two successive slides on the sealing strips. The guide has upper and lateral walls arranged for forming a U-shape and defining a passage. Guiding fingers extend radially from the neck. The fingers and stop are made of plastic or metal.
