Abstract (en)

To provide a sheet-discharging apparatus for a sheet-fed printing press in which a fan device is downsized, the visibility of an operator is improved, cleaning operation of the fan device is carried out easily, and a blast fan may be shifted easily and quickly to a desired position according to the size or the material of a sheet to be printed. There is provided a sheet-discharging apparatus for a sheet-fed printing press including: a fan device 11 having a plurality of blast fans 21 and a frame 22 for mounting the blast fans 21, in which at least some of the plurality of blast fans 21 are arranged in contact with the lower surface of a frame body 23 corresponding to elongated openings 25 formed on the thin-plate shaped frame body 23 which constitutes the frame 22, and are slidable in the feeding direction and/or in the widthwise direction with respect to the frame body 23.
