Abstract (en)

[origin: EP2006768A2] A first communication terminal (100) is a communication terminal which executes an application using user data which can be output to a second communication terminal (200), and has a management data making section (140) which makes management data including an access information of a server (300) capable of transmitting the application, and a data transmitting section (152) which transmits the user data and the management data to the second communication terminal (200).
