Abstract (en)

[origin: EP2007171A2] The unit has a null face plate (10) with a battery opening (12) that holds a battery of a hearing apparatus, and a battery contact arranged in the battery opening. A signal processing unit is connected to the battery contact and a mount (13) affixed to the battery opening that holds the signal processing unit. The signal processing unit is held by the mount in a non-final assembly position and the mount is snapped into the battery opening. A fixing element for affixing a battery cover and the mount is affixed to fixing element. A programming contact and the mount are affixed to the contact.
