Abstract (en)

[origin: WO2007123479A1] The present invention refers to a soilgoing roller (1) for agricultural machine comprising a cylinder body (4), which on its exterior is covered with a flexible and resilient material (5). According to the invention the covering material comprises an elongated string of material (5), which in a plurality of turns is spirally wound around the periphery of the cylinder body (4) and which in at least both of its ends is fastened to the cylinder body.
