Abstract (en)  
[origin: WO2007119941A1] The present invention relates to a functional footwear which comprises an sole having a toe-seating portion, whose height is higher than that of the remaining portion thereof other than the toe-seating portion, for allowing a user's toe to be seated thereon. The toe-seating portion of the sole of the functional footwear is formed higher than the remaining portion of the sole other than the toe-seating portion, so that toes of a walker are placed higher than the other portions of the sole of the feet of the walker, thereby obtaining an effect of the backward walking even when the walker walks forwardly.
