Abstract (en)

[origin: WO2007122067A1] The invention relates to an actuating unit (1) for displaceable furniture parts (15), in particular for drawers. Said unit comprises an ejector mechanism (2) that is used to displace a furniture part (15) from a closed position into an open position and a drive (4). According to the invention, an energy accumulator (9) can be charged by means of the drive (4) and the ejector mechanism (2) can be displaced in the opening direction by means of the energy accumulator (9) and the drive (4). The addition of an energy accumulator (9) allows smaller dimensions to be attained for the drive (4).
