Abstract (en)
[origin: WO2007113783A1] The invention concerns a plastic tubular package comprising a head assembled on a tubular body (1) consisting of a laminate (2) the ends of which are mutually sealed and covered with a strip (7), said laminate (2) consisting at least of one sealing layer (3, 5) and one non-sealing layer (4). The invention is characterized in that the strip (7) comprises a bi-oriented polymer (9) and a layer (8) enabling the strip (7) to be fixed on the laminate (2), the tensile rigidity of the strip (7) being further not less than the rigidity of the non-sealing layer (4).
