Abstract (en)
[origin: WO2007113663A2] A one-hole sink tap assembly, designed to fit to the horizontal supporting surface of a sink or cabinet, has a main body (1) for receiving a number of conduits for respective inflows of liquid; a spout (6) defining a number of passages for respective outflows of liquid; and a number of devices (2, 3, 5) for turning on/off and regulating the inflows of liquid to the outflows of liquid; and wherein one of the devices for turning on/off and regulating the inflows has a single-control mixer (2, 3) for mixing two of the inflows to one of the outflows.
