Abstract (en)
[origin: WO2007113518A2] A covering apparatus comprising an extendible screen, a longitudinal flexible element and a rotatable member, wherein one of the longitudinal flexible element and the rotatable member is fixed and the screen is attached to the other of the longitudinal flexible element and the rotatable member so as to permit relative movement of the screen relative to the fixed part, wherein the rotatable member is frictionally engaged with the longitudinal flexible element, and wherein there is provided means for preventing rotation of the rotatable member, whereby the screen is held in position relative to the fixed part.
