Abstract (en)
[origin: EP2008942A1] The present invention relates to a closure (1) for a container (100) having a neck and a mouth, such as an oil bottle, the closure having snap-fitting mutual engagement means (8). The closure (1) has portions (10) whose deformability is such that, after the initial opening, it is no longer possible to re-engage the mutual engagement means (8) simply by reclosing the closure (1).
