Abstract (en)
[origin: EP2009183A1] The formwork unit (10) has a grid mat (12) i.e. reinforcement mat, enclosed by a foil (18) i.e. shrinkage foil, where the grid mat includes longitudinal bars (14) and transverse bars (16, 16a-16e) that cross each other. The transverse bars include a flattened cross section, where a longer axis of the transverse bars is oriented at right angles to the longitudinal bars. The transverse bars arranged on a side of the longitudinal bars are different in the width. The longitudinal bars run vertically and the width of the transverse bars increases from the top to bottom.
