Abstract (en)

[origin: EP2009187A1] The floor drain has a drain cup with a top opening for ground water, and an outlet connected to a disposal line (19). An inflow housing (12) is arranged above the opening of the drain cup and is open on one side. The housing is connected to a wall-drain opening (13) in a vertical wall, such that drain cup is installed in the vertical wall, and the housing collects the ground water behind the wall-drain opening and directs the ground water into the cup. The housing has a wall with a lateral opening through which the ground water flows into the housing. An independent claim is also included for a method for installation of a sanitary device.
