Abstract (en)
[origin: WO2007080386A1] A document storage container assembly (100) comprises a storage container (102) , a first tray (330) mounted to the container so as to receive documents to be stacked, the bottom of said tray including an elongate aperture (331) opening into the storage container, - and a pusher member (103) mounted on and laterally extending from at least one elongate supporting member (104, 204) which is coupled to an operating mechanism (150, 250) located within the storage container; wherein the operating mechanism is adapted to first move the pusher member through the aperture from a retracted position to an extended position above the first tray and then to move the pusher member from the extended position laterally over the first tray , before moving the pushing member from the extended position to the retracted position orthogonally to the first tray so as to push any documents on the said first tray into the container through the aperture .
