Abstract (en)
[origin: EP2011668A2] The tab (10) has a channel (24) for receiving a marking pad and provided with a posterior wall (22) and an observation slot (20). The channel has an opening at one of its ends for inserting the pad, and two regions (26, 28) extending over a length of the channel, where the regions only occupy a part of a width of the channel. The regions mutually follow an inflection angle (alpha) lower than 180 degree along a bend made by an inflection line (30) extending in a longitudinal direction.
