Abstract (en)
A side-mounted fly-screen (10) comprising a part made in netting (11) which has a mesh designed to hold back mosquitoes or small insects preventing their entry through the doors, windows and other openings where the fly-screen is applied, and where at least one side of the netting (11) is applied to and held by a mobile vertical upright (12), while the other side is rolled onto a vertical roller (13), and where there is a lower profile (16), a few millimetres in height, on which a slider (17) carrying the upright (12) slides and where the slider (17) carrying the handle bar profile (12) is connected to the guide tracks (19) sliding in the lower horizontal profile (16) and inside a vertical containing profile (20) located to the rear of the vertical winding roller (13).
