Abstract (en)
[origin: EP2012061A1] The deflector (10) has a wall portion (10a) with an opening for passage of an injector of a combustion chamber, and longitudinal edges (10c, 10d) and transversal edges (10e, 10f). One of the longitudinal edges comprises a cover strip providing a housing along of an edge for a metallic fetching tab or edge (10'c) of an adjacent deflector (10') in a manner to seal a junction between the edges of the deflectors while permitting sliding of the edges with respect to each other during a dome wall of the chamber is dilated.
