Abstract (en)

[origin: WO2007115982A2] The invention concerns a method for authenticating a client terminal with an authentication server, said client terminal holding an authentication certificate. According to the invention, such a method includes the following phases: obtaining at least one encryption parameter by said client terminal; encrypting said authentication certificate by said client terminal, based on said at least one encryption parameter, delivering an encrypted authentication certificate; transmitting said encrypted authentication certificate to said server; obtaining said one encryption parameter by said server; decrypting said encrypted authentication certificate, based on said one encrypting parameter; authenticating and delivering an authentication assertion if the authentication is positive.
