Abstract (en)
[origin: WO2008138745A1] The stop rule (10) for circular saw benches consists of a profiled hollow body (14) extending longitudinally with a substantially right-angled cross section on which means (20, 20) for the attachment thereof to a table (12) are located and of which one side is designed as a guide member (22) with a coplanar extension (24) sticking out which has a guide rule (26) on the front edge thereof for low workpieces, which guide rule (26) sticks up vertically at right angles from the table (12) on which the guide member (22) lies when the stop rule (10) is in a horizontal position. The extension (24) which sticks out sideways has a horizontal contact surface (38) in the horizontal position of the stop rule (10) on which surface a vertically adjustable hold-down device (36) for low work pieces is attached.
