Abstract (en)
[origin: DE102006056280A1] The aerosol has a body, a valve arranged in a dome, a base, an inner sleeve (5) arranged on the base. The inner sleeve is provided with a cylindrical sleeve wall, a seal (7), a base element and a pin (9) arranged in a displaceable manner within the inner sleeve. The base element has a guide element for the pin and a retainer piece running through and fixed to the base of the aerosol can, the pin cooperating with a trigger element arranged outside the aerosol can. The inner sleeve has one flexible zone for pressure equalization between the can interior and the interior of the sleeve.
