Abstract (en)

[origin: EP1848188A1] A peer-to-peer network includes a first subscriber (A) and a second subscriber (B) as well as a monitoring server (MID-Server). E.g. communications from the second subscriber are set to be monitored on the basis of a judicial arrangement. The second subscriber is tagged with suitable means, i.e. his data is correspondingly amended in a distributed peer-to-peer data base.
