Abstract (en)

[origin: EP2014199A1] A procedure is described for manufacturing a mattress with a padded mattress panel and a gusset, by means of which a quilted outer mattress panel (1') is prepared with a gusset (14) attached to its underside around its whole perimeter, and a seam (15) attaches the upper part of the gusset to the mattress panel, passing through both the panel and the gusset, so that the seam is visible on the outer side, forming a contour around the mattress panel and making the perimeter of the mattress panel curve upwards.
