Abstract (en)

[origin: EP2014212A1] Combination of a dust suction nozzle and a cloth where the nozzle has a suction mouth, and the cloth is held at the nozzle under pressure. To prevent the suction of liquids the combination is provided with a sealing pad (22). The wiping active part of the sealing pad can be a fleece, e.g. a polypropylene or polyethylene fleece or a microfiber fleece. Independent claims are included for: (1) a cloth for a dust suction nozzle bonded to a sealing pad (2) a method for suction removal of moisture from a floor using a suction nozzle with a sealing pad.
