Abstract (en)

[origin: EP2014383A1] The sump (1) is made of a sheet metal and having a reinforced edge. The sump is resting under intermediate layer of a sealing in the installed condition at the internal-combustion engine or the drive. The reinforcement is made of a separate metal part (2), which is fixed under deformation of a sump edge (3) in a form fit and force fit manner. An independent claim is also included for a method for manufacturing a sump.
