Abstract (en)

[origin: EP2014550A2] Apparatus (100) having an inlet-mounted engine control component (130) is provided. A representative system includes: a forward keep out zone defined by converging inner (114) and outer (118) walls of a nacelle (102); an aft keep out zone defined by a containment zone (110); and an engine control component (130), at least a portion of which is located between the forward keep out zone and the aft keep out zone, and between the inner and outer walls of the nacelle.
