Abstract (en)  
A tray (1) includes a deck (2), a plurality of legs (10) projecting to one side of the deck, a plurality of apertures (20) formed in the other side of the deck and being arranged to allow passage of the legs of a second tray so that the second tray may be stacked in a nested fashion, and a plurality of movable covers associated with the respective apertures, said covers being slidable to selectively cover or open the apertures.
