Abstract (en)
  A packaging system includes a container having a closed end, an open end, a longitudinal axis running through the closed end and the open end,
  and an outer surface, a closure assembly fitted to the open end of the container and having an access port, and a detachable cap disposed over the
  access port. The system also includes a label disposed about the container, the label having first and second sections separated by a perforated
  boundary. The first section of the label is attached at least in part to the outer surface of the container and extends between the closed end and
  the perforated boundary. The second section extends at least between the perforated boundary and the cap. A method of using the system is also
  provided.
