Abstract (en)
[origin: EP2014807A1] The invention relates to a carpet and to the production method thereof. The carpet includes at least one layer of fabric (1) formed by a weft of longitudinal paper or cellulose elements (11) and a warp of longitudinal paper or cellulose elements (12), said longitudinal weft and warp elements (11, 12) intersecting one another in essentially perpendicular directions. The cross-section of the longitudinal weft elements (11) is noticeably larger than that of the longitudinal warp elements (12). Moreover, the longitudinal warp and/or weft elements (11, 12) are treated with natural biodegradable waxes and resins and can be dyed. The invention also relates to a method for producing the carpet using weaving techniques.
