Abstract (en)

Foundation for a device placed in the sea, such as, inter alia, a wind generator, which foundation comprises a bottom part placed on the bottom and a utility part supported by the bottom part, which utility part projects above the water level and comprises an interior space situated under water and having an opening situated under water, for transporting goods from a ship equipped for transportation under water. According to the invention, the opening situated under water has dimensions that are such that the ship can sail into the interior space through the opening situated under water and can moor in the interior space.
