Abstract (en)

[origin: EP2015080A2] The trip recorder has a housing, in which a printing device is arranged and a holding chamber are arranged for a roller of a printing material of the printing device. A contact unit is arranged in the holding chamber, which has a bearing block, at which a supporting axle arranges the roller of printing material. A carrier roller (18) is swiveling stored at the bearing block. The carrier roller is coupled with the rotary drive in the mounting position of the contact unit in the holding chamber.
