Abstract (en)

[origin: EP2015407A2] The connector has a filter device (20) with three conductors. Two contacts (A, B) are connected with the respective attachments (A', B') via respective two conductors. A third conductor exhibits a protection plate (22) that extends along a transverse plane of a filter casing (40). The protection plate is provided with a set of contact fingers (22.2) at an edge side along a largest part of circumference of the plate. The contact fingers rest on an inner side of the filter casing under elastic tension. The filter casing has a contact surface (41) for producing a ground connection.
