Abstract (en)

[origin: WO2007110871A2] The present invention relates to a method for treating, soothing or reducing the severity of a sore throat or other irritations of the throat for an extended period of time, especially during sleep, by administering a pharmaceutical composition into the back of the throat. The composition comprises an oily vehicle that provides an oily coating to the throat of a subject, and an active ingredient in an amount effective to treat, sooth or reduce the severity of a sore throat. The composition is preferably administered in the form of a throat spray, and provides relief from sore throat for an extended period of time, preferably overnight.
